

**Position Title:** Inpatient Endocrinologist (Assistant, Associate, or Full Professor)

**Division:** Endocrinology & Metabolism, Department of Medicine, UC San Diego School of Medicine

**Appointment:** Full-time (clinical series or HS clinical series, rank commensurate with experience)

---

## Position Summary

UC San Diego Health seeks a board-certified/board-eligible endocrinologist to join our growing **Hospital Endocrinology & Diabetes Service**. The successful candidate will focus almost exclusively on inpatient care—providing timely, evidence-based management of complex endocrine and metabolic disorders in a quaternary-referral academic center—while contributing to our mission of education, scholarship, and service.

---

## Major Clinical Responsibilities

- Serve as **attending physician** on the inpatient endocrinology and diabetes consult services at UCSD Medical Center (Hillcrest) and Jacobs Medical Center (La Jolla), typically 26–30 service weeks per year.
  - Lead and collaborate with a multidisciplinary team that may include endocrine APPs, registered nurses, pharmacists, endocrinology fellows, internal medical residents, and medical students.
  - Provide expert consultation for a wide spectrum of acute endocrine issues (e.g., hyperglycemic emergencies, complex thyroid disease, adrenal insufficiency, peri-operative glycemic optimization).
  - Ensure high-quality, timely documentation and direct communication with referring teams to facilitate seamless patient care transitions.
  - Outpatient duties are **minimal to none** (0-1 session per month).
- 

## Teaching & Scholarly Expectations

- **Teach and mentor** fellows, residents, and students during daily rounds, didactic conferences, and case-based learning sessions.
- Engage in **quality improvement, clinical research, or educational scholarship** related to inpatient endocrine care, diabetes technology, or hospital systems innovation.

- Present work locally, regionally, or nationally; protected academic time and institutional resources are available to support scholarly productivity commensurate with rank.
- 

## **Required Qualifications**

- MD, DO, or equivalent degree.
  - Board certification or eligibility in Endocrinology, Diabetes & Metabolism.
  - Eligibility for a California medical license at the time of hire.
  - Demonstrated commitment to the academic missions of patient care, teaching, and scholarship.
  - Record of, or strong potential for, excellence in managing complex endocrine conditions in a tertiary-care setting.
- 

## **Preferred Qualifications**

- Prior inpatient endocrinology experience and familiarity with hospital glycemic management protocols.
  - Experience working in or leading multidisciplinary care teams.
  - Evidence of scholarly activity (QI projects, publications, educational innovation) and interest in pursuing ongoing academic work.
- 

## **Salary & Benefits**

- Total Negotiated Salary (TNS) calculation can range from \$250,000 - \$300,000
  - Competitive UC salary scales plus negotiated clinical incentive.
  - Comprehensive UC benefits package (health, dental, vision, retirement, CME).
-
